

CompoTEK

Firma: CompoTEK GmbH
Internet: www.compotek.de

Brief description:

CompoTEK is a leading distributor for electronic components for hf-applications und wireless data communication. CompoTEK is focused on applications in the ISM-bands, ZigBee and W-LAN. In addition to transceiver chips and all other necessary components for wireless communications the portfolio includes certified modules and development tools for application at 350/433 and 868/915 MHz and 2,4 GHz. Due to the extensive experience of the CompoTEK FAEs in wireless applications, the services rendered do not only contain sales and distribution but also help and support for choosing the adequate components for the customer's application.

Products:

- Crystals, Oscillators, TCXOs, OCXOs, VCTCXO,
- VCOs and PLLs
- Hf-filter in various technologies
- Single-Chip-Transceivers
- Antennas
- MMICs
- Isolators, circulators
- Hf-connectors, cables, adaptors
- Seminars on antenna design, short-range-radio design, Zigbee technology
