

Firma: CompoTRON GmbH
Internet: www.compotron.com

Kurzbeschreibung:

CompoTRON is a technical representative and distributor for RF components for wireless data communication at 433MHz / 868MHz and 2.4GHz. Within the wireless data communication CompoTRON is focusing on customized applications in the ISM-bands such as wireless body networks, wireless meter reading and remote control.

In addition to the Semiconductor CompoTRON is offering the RFIC the full range of periferial components such as the reference X-tal, RF- booster amplifiers, SAW Filters and antennas and engineering and design support. Beside the components CompoTRON can support the customers with certified modules and solutions, including the software support.

Produkte:

- RF – ICs for ISM applications
- ISM Modules
- Antennas
- MMIC Amplifiers
- SAW, X-tal and ceramic RF filters
- VCOs, PLL Modules
- SMD X-tals, XOs, TCXOs, VCTCXO, OCXOs,
